

CS3300 Introduction to Software Engineering

Project 1 Submission Guidelines

Nimisha Roy ▶ nroy9@gatech.edu

Submission Instructions

What is to be Submitted? – 1 presentation and the **Software**

Software: packaging, documentation, and portability. The goal is to provide enough material, so that other people can use it and continue your work, if you are to open-source it --- in other words, you should make it easy and attractive for others to use your work.

Presentation guidelines

- Time allotted per group: 5 minutes + 1 minute for Q/A
- Include the necessary details that you think are the most important and deserve to be discussed within the time constraints. Include team effort distribution.
- Workflow- Show a demo of the application, include the deployed weblink for the demo in your ppt
- Email your presentations to me at nroy9@gatech.edu with the subject as “TeamXX project 1 presentation” **before 9:00 AM on October 13th**

Software Guidelines

- Submit as a zip file submission on Canvas
- Include a README.txt describing the basic workflow to run a demo of your application, and a brief description of the organized file contents
- Include all the codes and packages necessary to run the application and written as part of the application
- Group submission. One person per group will submit.

Grading

- **Presentation & Demo In class:** 10 points towards the final grade
- **Submitted Presentation file:** 10 points towards the final grade
- **Software:** 5 points towards the final grade
